1.0 INTRODUCTION

It is well recognised that Final Year Project report is an important component of the first-degree curriculum. Students are required to take the Final Year Project towards or at the end of the studies. The Final Year Project report is an academic write-up that details the whole project process undertaken by student, right from the conceptualisation of a problem to the discussion of his/her findings or outputs. Basically, the Final Year Project aims to train student to carry out a small-scale research activity (i.e. system development or system evaluation in the context of IT).

The course consists of 6 credit hours and it is a compulsory course.

1.1 Learning Outcomes

By the end of this course, students should be able to conduct an academic research in the field of Information Technology by:

1. Identify a range of techniques for generating, evaluating and selecting design concepts related to the problem, objective, and literature of the research to meet specified requirements.
2. Analyse the current issues faced by ICT industry using research method for solution and improvement.
3. Apply communication knowledge in managing data and information of the specific issues related to the project research
4. Describe the project report on specific subject using technical writing skills.

1.2 Requirements of Final Year Project

1. Students must obtain a CGPA of 2.00 and above before registering for this course.
2. Students registering for the course must be in their last semester of study.
3. Final Year Project deliverables include:

Student Submission

Timeline	Deliverables	Submit to
Registration Period	Project Registration Form	Faculty
First Meeting	Project proposal	Supervisor
End of semester - Jan Semester: 30 April - May Semester: 31 August - Sept Semester: 31 December	1) Final Year Project report (binding) 2) Soft copy via e-mail containing: • Student Log Book • Final Year Project report (pdf format), and • System files (if applicable)	Supervisor

Supervisor Submission

Timeline	Deliverables	Submit to
21 days after submission date	1) Final Year Project report (binding) 2) Soft copy via e-mail containing: • Final Year Project Evaluation Form • Student Log Book • Final Year Project report (pdf format), and • System files (if applicable)	Faculty

Faculty Submission

Timeline	Deliverables	Submit to
Within 1 week after submission marks by supervisor	Soft copy via e-mail containing: 1) Excel file with: students' name, supervisor name, project title and the marks 2) Final Year Project Evaluation Form 3) Student Log Book, Final Year Project report (pdf format) and system files (if applicable)	Open University Malaysia

4. For students who are able to complete within the deadline of submission for that particular semester, the grade will be announced in the same semester.
5. In a situation, that students are fail to complete within the stipulated time, grade F will be given and they need to re-register the overall course.

2.0 SUGGESTED AREAS FOR STUDY

The scope of the Final Year Project is program dependent. The project titles cover a wide range of topics to meet the course objectives. Project topics can be proposed by student or the supervisor concerned. Students can select any field for the project based on Table 1.

Table 1: Suggested Areas for Project Implementation
▪ Database System Development ▪ E-Commerce System Application ▪ E-Learning Application ▪ Information System Development /Application ▪ Management Information System ▪ Mobile Application ▪ Multimedia Application Development ▪ Programming/Open Source Projects ▪ Web Based System Development /Application ▪ Network Management ▪ Database System Development ▪ Portal Development ▪ Decision Support Systems ▪ Intelligence System ▪ Knowledge Based System ▪ Tracking system / applications

After deciding on the project area implementation, there are 2 types of projects rubrics. Details as explained below. Students are expected to discuss with their supervisor and choose one which is applicable to their project area.

2.1 System Development (Application Based Project)

This type of project normally includes but not limited to development of new or improvement of existing system, network, implementation, coding and working prototype.

2.2 System Usability and System Function Evaluation (Research Based Project)

This type of project typically includes but not limited to proof of concept and design, either new algorithms or enhancement of ideas supported by information technology related data or laboratory data or lab simulation or lab prototype, model or publication.

3.0 SUPERVISOR APPOINTMENT

The supervisor can be a lecturer who has a PhD or Masters in the field that are interested to do in their project. Supervisors can be appointed among the internal lecturers of the faculty or in certain cases, external lecturers from others institutional.

Once the supervisor has been identified by the student, their need to contact him/her by phone or email. When the supervisor has agreed to be a supervisor, fill up the Project Registration Form and submit to the Faculty. **(Appendix 1)**

3.1 Supervision

Basically, students need to have 4 - 6 meetings (face-to-face or virtual) with the supervisor. Student must discuss their project topic with the supervisor in the first meeting with him/her. It is recommended that student to complete the project proposal by the second meeting with the supervisor.

3.2 Student Log Book

During the discussion, student need to bring along the **Student Log Book**. It is very important to record the students meeting with their supervisor in the Student Log Book. The supervisor's comments are to be recorded in the Log Book. At the end of the meeting, student must also get the supervisor's signature (digital signature is accepted) as evidence that the meeting was conducted. The log book has to be submitted together with the final report. **(Appendix 2)**

4.0 IMPLEMENTATION OF FINAL YEAR PROJECT

In the course of the project, there are several deliverables as mentioned in 1.1. The deliverables will be explained in full here.

4.1 Final Year Project Proposal

The first task that needs to be done after the registration process is to come up with a **Final Year Project Proposal**. Project Proposal should contain the following:

- Title of the project
- Introduction
- Problem Statement
- Objective
- Project Scope
- Requirement of Software/Hardware needed in the project (if applicable)
- Gantt Chart
- Conclusion

The **Final Year Project Proposal** can be 3-5 pages (1.5 spacing) and need to be submitted to supervisor by the first meeting.

4.2 Final Year Project Report

After the proposal has been approved by the appointed supervisor, student can proceed to write the report and eventually develop the system (if applicable). The following are the chapters (to be included in the final report) and time frame that are proposed.

The following is the guideline for the Final Year Project report writing for the **system development project**:

Table 2: Guide for **System Development**

	Proposed Chapters	**Proposed Time Frame**	**Proposed Number of Pages in the Final Report**
(1)	Introduction (problem statement, objective, scope, limitation, implementation plan)	2 weeks	3 - 5 pages
(2)	Literature Review	4 weeks	6 - 10 pages
(3)	Analysis & Design: Program design, Database design, Interface design, etc	4 weeks	20 - 30 pages
(4)	Implementation/Programming and Testing	4 weeks	20 - 30 pages
(5)	Summary and Conclusion	2 weeks	3 - 5 pages
(6)	References Appendix	-	
	TOTAL	**16 WEEKS**	**50 – 80 pages**

The following is the guideline for the Final Year Project report writing for the **system usability and system function evaluation project**:

Table 3: Guide for **System Usability and System Function Evaluation**

	Proposed Chapters	**Proposed Time Frame**	**Proposed Number of Pages in the Final Report**
(1)	Introduction (problem statement, objective, scope, limitation, implementation plan)	2 weeks	3 - 5 pages
(2)	Literature Review	4 weeks	10 - 15 pages
(3)	Research Methodology	4 weeks	14 - 25 pages
(4)	Research Findings and Discussion	4 weeks	20 - 30 pages
(5)	Summary and Conclusion	2 weeks	3 - 5 pages
(6)	References Appendix	-	
	TOTAL	**16 WEEKS**	**50 - 80 pages**

4.3 Content of the Final Year Project Report

Contents of the Final Year Project Report should be arranged in the following order (refer Figure 1 and 2). However, **this is only a guide, as project papers differ in terms of the contents, headings and subheadings**. Student should consult with their supervisor and discuss with them when finalising the arrangements and contents for the final report.

4.4 Format of Final Year Project Report

It is very important to follow carefully the guidelines for preparing the report. The following items are to be observed in preparing the Final Year Project report:

a. Preliminary section

Consists of the title page, declaration, abstract, acknowledgements, table of contents, list of tables and list of figures.

All pages in the preliminary section are to be numbered at the centre of the bottom margin using lower-case Roman numerals (ii, iii, iv, etc.).

The title page should not be numbered.

b. Page set up:

Set the page margins with an offset of 1 inch (or 2.5 cm) from the top, bottom, left and right. All text, figures and tables must be within this area.

c. Paper size:

Use only A4 size white paper. The report should be printed on one side of the paper.

d. Font type:

Times New Roman, size 12

Line spacing:

1.5 spacing between lines and triple spacing between paragraphs.

e. Numbering format for headings:

The sections and sub-section in the report must follow the numbering format below:

1.0 Main heading

1.1 Secondary heading

1.1.1 Third heading…and etc.

f. Illustrations:

Label all charts, graphs and tables.

g. References:

The source of information or references should be placed at the end of the report in numbered order. Please use the APA writing style for your references.

5.0 COMPLETION OF FINAL YEAR PROJECT

Upon completion of a final year project, student need to submit the complete report to supervisor for the evaluation purpose. Supervisor will grade the final year project and report the marks to the faculty. The faculty will then share the marks with Open University Malaysia (OUM) through excel files with all the students' names. The excel sheet must have all the final marks. In addition, the following files also need to be submitted to OUM: Final Year Project Report, Log Book, Supervisor Evaluation Form, System File.

5.1 Final Year Project Rubrics

The purpose of the Final Year Project Rubrics is to ensure that students understand what is expected to completing their final report. (**Appendix 10**)

Rubric A is provided for students doing the System Development project and Rubric B is for students doing the System Usability and System Function Evaluation Project.

5.2 Final Year Project Evaluation

The Final Year Project will be evaluated by Supervisor (50% weightage), and Internal Reviewer (50% weightage) based on the project report, student log book, system development and oral presentation (if applicable). (**Appendix 11**).

The Undergraduate Final Year Project evaluation process is based on the following (Supervisor):

- Read through the project report and evaluate it using the evaluation form provided
- Please choose either **Rubric A** (System Development - Application Based Project) or **Rubric B** (System Usability and System Function Evaluation - Research Based Project)
- Award marks according to each item provided
- Submit the copy of the following items to faculty:
  - Final Year Project Report,
  - Log Book
  - System Files (if doing application based project) in folder named 'system files' and
  - Undergraduate Final Year Project Evaluation Report.

IMPORTANT
Mark awarded by Supervisor to be treated as "**Private and Confidential**".

Please sign the report.

5.3 Format Checklist

No.	Item
1.	Required number of pages for the Final Year Project report must be a minimum of 50 pages (pages are only counted from Chapter 1 to last page of Chapter 5)
2.	Front cover with Title, Name of Student, Name of University & Year of Submission • Title – not more than 16 words, arranged in inverted triangle shape • Font – Arial Narrow 18 *(Refer to Appendix 3)*
3.	Title page with Title, Name of Student, Purpose Statement, Name of University and Year of Submission • Lettering – Arial Narrow Font 14 *(Refer to Appendix 4)*
4.	Declaration Page • Heading: Times New Roman Font 14 • Text: Times New Roman Font 12 • Roman numeral ii starts here. *(Refer to Appendix 5)*
5.	Abstract • Heading: Times New Roman Font14 • Text: Times New Roman Font 12 • Abstract in one paragraph, single spacing, not more than 250 words *(Refer to Appendices 6)*
6.	Acknowledgements • Heading: Times New Roman Font 14 • Text : Times New Roman Font 12 • Double spacing, not more than 1 page. *(Refer to Appendix 7)*
7.	Table of Contents • Heading: Times New Roman Font 14 • Text : Font Times New Roman 12 *(Refer to Appendix 8)*

8.	Margin • First page of each chapter Top – 5 cm/2 inches Right – 2.5 cm/1 inch Left – 2.5 cm/1 inch Bottom – 2.5 cm/1 inch • Text in subsequent pages Top – 2.5 cm/1 inch Right – 2.5 cm/1 inch Left – 2.5 cm/1 inch Bottom – 2.5 cm/1 inch **Line spacing:** 1.5 spacing between lines and triple spacing between paragraphs.
9.	Internal organisation of text follows the format below. Chapter 1 Chapter Heading → Level 1 1.1 Main heading 1 → Level 2 1.1.1 Sub-heading 1 1.1.2 Sub-heading 2 → Level 3 1.1.3 _____ 1.2 Main heading 2 1.2.1 _____ 1.2.2 _____ 1.3 Main heading 3 1.3.1 _____ 1.3.2 _____
10.	Table & Figure Labels • Table – Left aligned, Title above table • Figure/Graph – Centre aligned, Title below figure/graph
11.	References precede the appendices and in APA writing style
12.	Appendices • Pages numbered • Label – Right aligned, capitalized, Font Times New Roman 12 • Title – Centre, title case, Times New Roman 12 *(Refer to Appendix 9)*

I would like to take this opportunity to express my gratitude and appreciation to my supervisor, XXXXXXXXXXXXX guidance, patience and invaluable advice throughout this project.

I also would like to express my appreciation to my family and friends for their endless support whenever I face problems. Without the mentioned parties, it is impossible for me to complete this project report successfully.

(Times New Roman, size 12, Lower Case)

THANK YOU.

Assessment Rubric for Final Year Project

RUBRIC A - SYSTEM DEVELOPMENT

Dimension	1	2	3	4	Weight	Max Score
Introduction	• The title hardly reflects the focus of the system, revealing little information about the variables, subjects & system setting. • Background information is hardly relevant and does not provide a clear lead-in to the problem statement. • Problem statement is hardly articulated clearly and not supported/ justified by theory and/or past system. • Objectives, scope and limitation are hardly focused and clear. • Implementation plan not provided.	• The title reflects the focus of the system, revealing some information about the variables, subjects & system setting. • Background information is fairly relevant but does not provide a clear lead-in to the problem statement. • Problem statement is articulated fairly clearly but only minimally supported/ justified by theory and/or past system. • Objectives, scope and limitation are fairly focused and clear. • Implementation plan is inadequate.	• The title clearly reflects the focus of the system, revealing fairly adequate information about the variables, subjects & system setting. • Background information is relevant and provide a clear lead-in to problem statement. • Problem statement is articulated clearly and supported/justified by theory and/or past system. • Objectives, scope and limitation are focused and clear. • Implementation plan is sufficient but can be improved.	• The title very clearly reflects the focus of the system, revealing adequate information about the variables, subjects & system setting. • Background information is very relevant and provides a very clear lead-in to the problem statement. • Problem statement is articulated very clearly & well supported /justified by theory and/or past system. • Objectives, scope and limitation are highly focused and clear • Implementation plan is complete and well planned.	2.5	10
Literature Review	• Hardly any evidence of critical analyses of past systems. • The review indicates little understanding of the system.	• Little evidence of critical analyses of theory and/or past systems. • The review indicates fairly good understanding of the system.	• Some evidence of critical analyses of theory and/or past systems. • The review indicates good understanding of the system.	• Ample evidence of critical analyses of theory & past systems. • The review indicates very good understanding of the system.	2.5	10

System Analysis and Design	• Somewhat appropriate research design that is capable of addressing only some of the objectives. • Rather vague description of the requirements analysis technique(s). • Only one feasibility study reviewed: cost-benefit analysis, technical feasibility, time feasibility and operational feasibility. • Justifications for the use of the methodology are vaguely presented and not discussed. • Very little description of methodology use: SDLC/prototyping. • Only one method of systems analysis & design given: DFD,ERD, Normalization, UML. • Data analyses are appropriate but hardly adequate to address the research questions.	• Fairly Appropriate research design that is capable of addressing some of the objectives. • Fairly clear description of the requirements analysis technique(s). • Some feasibility studies reviewed like cost-benefit analysis, technical feasibility, time feasibility and operational feasibility. • Justifications for the use of the methodology are presented but not adequately discussed. • Some description of methodology used: SDLC/prototyping. • Some methods of systems analysis & design given: DFD,ERD, Normalization, UML. • Data analyses are appropriate but only adequate to address some of the research questions.	• Appropriate research design that is capable of addressing all the objectives. • Clear description of the requirements analysis technique(s). • Detailed feasibility studies reviewed like cost-benefit analysis, technical feasibility, time feasibility and operational feasibility • Justifications for the use of the methodology are presented and somewhat adequately discussed. • Accurate description of methodology used: SDLC/prototyping. • Nearly all methods of systems analysis & design given: DFD,ERD, Normalization, UML. • Data analyses are appropriate, and are adequate to address most of the research questions.	• Very appropriate research design that is capable of addressing all the objectives. • Very clear description of the requirements analysis technique(s). • Very detailed feasibility studies reviewed like cost-benefit analysis, technical feasibility, time feasibility and operational feasibility. • Justifications for the use of the methodology are clearly presented and adequately discussed. • Very accurate description of methodology used: SDLC/prototyping. • All methods of systems analysis & design given: DFD,ERD, Normalization, UML. • Data analyses are appropriate, extensive and sophisticated, and are adequate to address all the research questions.	5	20

System Implementation and Testing	• Program may have syntactic and / or logic errors, incomplete test scenarios that tests some data some and processes. • The discussion on installation strategies is incomplete with only either the user or system guides.	• Some syntactically & logically correct codes, complete test scenarios that tests data and processes. • The discussion on some installation strategies is complete with user and system guides.	• Mostly syntactically & logically correct codes mostly complete test scenarios that tests data and processes. • The discussion on most installation strategies is complete with user and system guides.	• Syntactically & logically correct codes, complete test scenarios that tests data and processes. • The discussion on installation strategies is complete with user and system guides.	10	40
Summary and Conclusion	• The discussion may be incomplete or partially/not clearly connected to the objectives. The connection with other sections is vague. • Implications and recommendations are not discussed. • Limitations and future development of the study are somewhat irrelevant.	• The discussion interprets some of the findings and is somewhat connected with other sections of the report such as the background, problem statement and objectives. • Implications and recommendations are insufficient. • Limitations of the study are fairly relevant but not adequately described.	• The discussion interprets most of the findings and is connected with other sections of the report such as the background, problem statement and objectives. • Implications and recommendations are discussed adequately. • Limitations of the study are relevant and adequately described.	• The discussion soundly interprets all the findings and is carefully connected with other sections of the report such as the background, problem statement and objectives. • Implications and recommendations are well discussed. • Limitations of the study are very relevant and extensively described.	2.5	10
Writing Style, Language Use & grammatical accuracy	• Writing style and language use are not apt for academic writing. • Many grammatical errors that impede communication.	• Writing style and language use are fairly apt for academic writing. • Some grammatical errors that impede communication.	• Writing style and language use are apt for academic writing. • A few grammatical errors that impede communication.	• Writing style and language use are very apt for academic writing. • Hardly any grammatical errors that impede communication.	1.25	5

Overall Presentation of the Final Report	• The abstract is missing, incomplete or inaccurate. • The presentation format including the graphics is at a minimum level of acceptability, though at times messy and confusing. • Citations are rather incomplete or inaccurate and provide little avenue to check the validity of the information gathered. • Organisation of chapters lacks logical sequencing and ideas are not clearly developed.	• The abstract summarizes the study by mere lifting sentences, at times irrelevant, from the final project report. • The presentation format including the graphics is fairly acceptable. • Some sources are cited in a proper format to enable accuracy checking. • Chapters are somewhat loosely organised but the main sections still stand out. Ideas are stated but at times not clearly developed.	• The abstract summarizes the study with some essentials points missing. • The presentation format including the graphics is acceptable. • Most sources are cited accurately to demonstrate the credibility of the information presented. • Chapters are organised with logical sequencing. Ideas are developed with some support.	• The abstract concisely summarizes the study with all the essential points included. • The presentation format including the graphics demonstrates author's attention to detail, neatness and care. • All sources are cited accurately to demonstrate the credibility of the information presented. • Chapters are well organised with logical sequencing. Ideas are clearly developed with adequate support.	1.25	5

RUBRIC B - SYSTEM USABILITY AND SYSTEM FUNCTION EVALUATION

Dimension	1	2	3	4	Weight	Max Score
Introduction	• The title hardly reflects the focus of the study, revealing little information about the variables, subjects & research setting. • Background information is hardly relevant and does not provide a clear lead-in to the research problem. • Problem statement is hardly articulated clearly and not supported/justified by theory and/or past research. • Research Objectives & Questions/ hypotheses, scope and limitation are hardly focused and clear. • Hardly any key terms are operationally defined clearly. • Implementation plan not provided.	• The title reflects the focus of the study, revealing some information about the variables, subjects & research setting. • Background information is fairly relevant but does not provide a clear lead-in to the research problem. • Problem statement is articulated fairly clearly but only minimally supported/ justified by theory and/or past research. • Research Objectives & Questions/ hypotheses, scope and limitation are fairly focused and clear. • Some key terms are operationally defined clearly. • Implementation plan is inadequate.	• The title clearly reflects the focus of the study, revealing fairly adequate information about the variables, subjects & research setting. • Background information is relevant and provide a clear lead-in to research problem. • Problem statement is articulated clearly and supported/justified by theory and/or past research. • Research Objectives & Questions/ hypotheses, scope and limitation are focused and clear. • Most key terms are operationally defined clearly. • Implementation plan is sufficient but can be improved.	• The title very clearly reflects the focus of the study, revealing adequate information about the variables, subjects & research setting. • Background information is very relevant and provides a very clear lead-in to the research problem. • Problem statement is articulated very clearly & well supported /justified by theory and/or past research. • Research Objectives & Questions/ hypotheses, scope and limitation are highly focused and clear. • All key terms are operationally defined clearly. • Implementation plan is complete and well planned.	2.5	10

Literature Review	• The number of empirical studies being reviewed is inadequate. • Articles reviewed are dated and hardly relevant to the focus of the study. • Hardly any evidence of critical analyses of theory and/or past research. • The review indicates little understanding of the research topic.	• The number of empirical studies being reviewed is fairly adequate. • Articles reviewed are fairly relevant to the focus of the study but somewhat dated. • Little evidence of critical analyses of theory and/or past research. • The review indicates fairly good understanding of the research topic.	• The number of empirical studies being reviewed is adequate. • Articles reviewed are current and relevant to the focus of the study but somewhat dated. • Some evidence of critical analyses of theory and/or past research. • The review indicates good understanding of the research topic.	• The number of empirical studies being reviewed is more than adequate. • Articles reviewed are very current and relevant to the focus of the study. • Ample evidence of critical analyses of theory & past research. • The review indicates very good understanding of the research topic.	5	20
Methodology	• Somewhat appropriate research design that is capable of addressing only some of the research questions. • Rather vague description of the research sample, sampling techniques and data collection procedures. • Justifications for the use of the methodology are vaguely presented and not discussed.	• Fairly Appropriate research design that is capable of addressing some of the research questions. • Fairly clear description of the research sample, sampling techniques, data collection procedures and methods of data analysis. • Justifications for the use of the methodology are presented but not adequately discussed.	• Appropriate research design that is capable of addressing most of the research questions. • Clear description of the research sample, sampling techniques, data collection procedures and methods of data analysis. • Justifications for the use of the methodology are presented and somewhat adequately discussed.	• Very appropriate research design that is capable of addressing all the research questions. • Very clear description of the research sample, sampling techniques, data collection procedures and methods of data analysis. • Justifications for the use of the methodology are clearly presented and adequately discussed.	5	20

Research Findings and Discussions	• Results and findings are somewhat inaccurate or incompletely presented. • Data analyses are appropriate but hardly adequate to address the research questions. • The discussion may be incomplete or partially/not clearly connected to the results. The connection with other sections is vague.	• Results and findings are presented correctly but the interpretation lacks accuracy. • Data analyses are appropriate but only adequate to address some of the research questions. • The discussion interprets some of the findings and is somewhat connected with other sections of the report such as the background, problem statement, research questions, instruments and results.	• Results and findings are presented correctly with accurate interpretation. • Data analyses are appropriate, and are adequate to address most of the research questions. • The discussion interprets most of the findings and is connected with other sections of the report such as the background, problem statement, research questions, instruments and results.	• Results and findings are presented correctly with accurate and detailed interpretation. • Data analyses are appropriate, extensive and sophisticated, and are adequate to address all the research questions. • The discussion soundly interprets all the findings and is carefully connected with other sections of the report such as the background, problem statement, research questions, instruments and results.	7.5	30

Summary and Conclusion	• The discussion may be incomplete or partially/not clearly connected to the results. The connection with other sections is vague. • The findings presented are mere repetitions of the results without appropriate interpretation. • Implications, recommendations and directions for future research are hardly drawn from the research findings. • Limitations of the study are somewhat irrelevant.	• The discussion interprets some of the findings and is somewhat connected with other sections of the report such as the background, problem statement, research questions, instruments and results. • The findings are either superficially discussed or not discussed in relation to theory and findings of past studies cited in literature review. • Implications, recommendations and directions for future research are drawn from some of the research findings. • Limitations of the study are fairly relevant but not adequately described.	• The discussion interprets most of the findings and is connected with other sections of the report such as the background, problem statement, research questions, instruments and results. • The findings are discussed in relation to theory and findings of past studies cited in literature review. • Implications, recommendations and directions for future research are drawn from most of the research findings. • Limitations of the study are relevant and adequately described.	• The discussion soundly interprets all the findings and is carefully connected with other sections of the report such as the background, problem statement, research questions, instruments and results. • The findings are judiciously discussed in relation to theory and findings of past studies cited in literature review. • Implications, recommendations and directions for future research are carefully drawn from all the research findings. • Limitations of the study are very relevant and extensively described.	2.5	10
Writing Style, Language Use & grammatical accuracy	• Writing style and language use are not apt for academic writing. • Many grammatical errors that impede communication.	• Writing style and language use are fairly apt for academic writing. • Some grammatical errors thatimpede communication.	• Writing style and language use are apt for academic writing. • A few grammatical errors thatimpede communication.	• Writing style and language use are very apt for academic writing. • Hardly any grammatical errors that impede communication.	1.25	5

Overall Presentation of Final Report	• The abstract is missing, incomplete or inaccurate. • The presentation format including the graphics is at a minimum level of acceptability, though at times messy and confusing. • Citations are rather incomplete or inaccurate and provide little avenue to check the validity of the information gathered. • Organisation of chapters lacks logical sequencing and ideas are not clearly developed.	• The abstract summarizes the study by mere lifting sentences, at times irrelevant, from the final project report. • The presentation format including the graphics is fairly acceptable. • Some sources are cited in a proper format to enable accuracy checking. • Chapters are somewhat loosely organised but the main sections still stand out. Ideas are stated but at times not clearly developed.	• The abstract summarizes the study with some essentials points missing. • The presentation format including the graphics is acceptable. • Most sources are cited accurately to demonstrate the credibility of the information presented. • Chapters are organised with logical sequencing. Ideas are developed with some support.	• The abstract concisely summarizes the study with all the essential points included. • The presentation format including the graphics demonstrates author's attention to detail, neatness and care. • All sources are cited accurately to demonstrate the credibility of the information presented. • Chapters are well organised with logical sequencing. Ideas are clearly developed with adequate support.	1.25	5

GUIDELINE FOR UNDERGRADUATE FINAL YEAR PROJECT EVALUATION (SUPERVISOR)

The Undergraduate Final Year Project evaluation process is based on the following:

- Read through the project report and evaluate it using the evaluation form provided
- Please choose either **Rubric A** (System Development - Application Based Project) or **Rubric B** (System Usability and System Function Evaluation - Research Based Project)
- Award marks according to each item provided

Supervisor to submit via e-mail to the Faculty:

Soft copies of

- Final Year Project Report,
- Log Book
- System Files (if doing application based project) in folder named 'system files' and
- Undergraduate Final Year Project Evaluation Report.

IMPORTANT

Mark awarded by Supervisor to be treated as "**Private and Confidential**".

Please sign the report.

Undergraduate Final Year Project Evaluation Report – BIT

RUBRIC A - System Development (Application Based Project)

Dimension	1	2	3	4	Weight	Maximum marks	Marks
Introduction	● The title hardly reflects the focus of the system, revealing little information about the variables, subjects & system setting. ● Background information is hardly relevant and does not provide a clear lead-in to the problem statement. ● Problem statement is hardly articulated clearly and not supported/ justified by theory and/or past system. ● Objectives, scope and limitation are hardly focused and clear. ● Implementation plan not provided.	● The title reflects the focus of the system, revealing some information about the variables, subjects & system setting. ● Background information is fairly relevant but does not provide a clear lead-in to the problem statement. ● Problem statement is articulated fairly clearly but only minimally supported/ justified by theory and/or past system. ● Objectives, scope and limitation are fairly focused and clear. ● Implementation plan is inadequate.	● The title clearly reflects the focus of the system, revealing fairly adequate information about the variables, subjects & system setting. ● Background information is relevant and provide a clear lead-in to problem statement. ● Problem statement is articulated clearly and supported/justified by theory and/or past system. ● Objectives, scope and limitation are focused and clear. ● Implementation plan is sufficient but can be improved.	● The title very clearly reflects the focus of the system, revealing adequate information about the variables, subjects & system setting. ● Background information is very relevant and provides a very clear lead-in to the problem statement. ● Problem statement is articulated very clearly & well supported /justified by theory and/or past system. ● Objectives, scope and limitation are highly focused and clear ● Implementation plan is complete and well planned.	2.5	10	
Literature Review	● Hardly any evidence of critical analyses of past systems. ● The review indicates little understanding of the system.	● Little evidence of critical analyses of theory and/or past systems. ● The review indicates fairly good understanding of the system.	● Some evidence of critical analyses of theory and/or past systems. ● The review indicates good understanding of the system.	● Ample evidence of critical analyses of theory & past systems. ● The review indicates very good understanding of the system.	2.5	10	

System Analysis and Design	● Somewhat appropriate research design that is capable of addressing only some of the objectives. ● Rather vague description of the requirements analysis technique(s). ● Only one feasibility study reviewed: cost-benefit analysis, technical feasibility, time feasibility and operational feasibility. ● Justifications for the use of the methodology are vaguely presented and not discussed. ● Very little description of methodology use: SDLC/prototyping. ● Only one method of systems analysis & design given: DFD,ERD, Normalization, UML. ● Data analyses are appropriate but hardly adequate to address the research questions.	● Fairly Appropriate research design that is capable of addressing some of the objectives. ● Fairly clear description of the requirements analysis technique(s). ● Some feasibility studies reviewed like cost-benefit analysis, technical feasibility, time feasibility and operational feasibility. ● Justifications for the use of the methodology are presented but not adequately discussed. ● Some description of methodology used: SDLC/prototyping. ● Some methods of systems analysis & design given: DFD,ERD, Normalization, UML. ● Data analyses are appropriate but only adequate to address some of the research questions.	● Appropriate research design that is capable of addressing all the objectives. ● Clear description of the requirements analysis technique(s). ● Detailed feasibility studies reviewed like cost-benefit analysis, technical feasibility, time feasibility and operational feasibility ● Justifications for the use of the methodology are presented and somewhat adequately discussed. ● Accurate description of methodology used: SDLC/prototyping. ● Nearly all methods of systems analysis & design given: DFD,ERD, Normalization, UML. ● Data analyses are appropriate, and are adequate to address most of the research questions.	● Very appropriate research design that is capable of addressing all the objectives. ● Very clear description of the requirements analysis technique(s). ● Very detailed feasibility studies reviewed like cost-benefit analysis, technical feasibility, time feasibility and operational feasibility. ● Justifications for the use of the methodology are clearly presented and adequately discussed. ● Very accurate description of methodology used: SDLC/prototyping. ● All methods of systems analysis & design given: DFD, ERD, Normalization, UML. ● Data analyses are appropriate, extensive and sophisticated, and are adequate to address all the research questions.	5	20	

System Implementation and Testing	● Program may have syntactic and / or logic errors, incomplete test scenarios that tests some data some and processes. ● The discussion on installation strategies is incomplete with only either the user or system guides.	● Some syntactically & logically correct codes, complete test scenarios that tests data and processes. ● The discussion on some installation strategies is complete with user and system guides.	● Mostly syntactically & logically correct codes mostly complete test scenarios that tests data and processes. ● The discussion on most installation strategies is complete with user and system guides.	● Syntactically & logically correct codes, complete test scenarios that tests data and processes. ● The discussion on installation strategies is complete with user and system guides.	10	40	
Summary and Conclusion	● The discussion may be incomplete or partially/not clearly connected to the objectives. The connection with other sections is vague. ● Implications and recommendations are not discussed. ● Limitations and future development of the study are somewhat irrelevant.	● The discussion interprets some of the findings and is somewhat connected with other sections of the report such as the background, problem statement and objectives. ● Implications and recommendations are insufficient. ● Limitations of the study are fairly relevant but not adequately described.	● The discussion interprets most of the findings and is connected with other sections of the report such as the background, problem statement and objectives. ● Implications and recommendations are discussed adequately. ● Limitations of the study are relevant and adequately described.	● The discussion soundly interprets all the findings and is carefully connected with other sections of the report such as the background, problem statement and objectives. ● Implications and recommendations are well discussed. ● Limitations of the study are very relevant and extensively described.	2.5	10	
Writing Style, Language Use & grammatical accuracy	● Writing style and language use are not apt for academic writing. ● Many grammatical errors that impede communication.	● Writing style and language use are fairly apt for academic writing. ● Some grammatical errors that impede communication.	● Writing style and language use are apt for academic writing. ● A few grammatical errors that impede communication.	● Writing style and language use are very apt for academic writing. ● Hardly any grammatical errors that impede communication.	1.25	5	

Overall Presentation of the Final Report	● The abstract is missing, incomplete or inaccurate. ● The presentation format including the graphics is at a minimum level of acceptability, though at times messy and confusing. ● Citations are rather incomplete or inaccurate and provide little avenue to check the validity of the information gathered. ● Organisation of chapters lacks logical sequencing and ideas are not clearly developed.	● The abstract summarizes the study by mere lifting sentences, at times irrelevant, from the final project report. ● The presentation format including the graphics is fairly acceptable. ● Some sources are cited in a proper format to enable accuracy checking. ● Chapters are somewhat loosely organised but the main sections still stand out. Ideas are stated but at times not clearly developed.	● The abstract summarizes the study with some essentials points missing. ● The presentation format including the graphics is acceptable. ● Most sources are cited accurately to demonstrate the credibility of the information presented. ● Chapters are organised with logical sequencing. Ideas are developed with some support.	● The abstract concisely summarizes the study with all the essential points included. ● The presentation format including the graphics demonstrates author's attention to detail, neatness and care. ● All sources are cited accurately to demonstrate the credibility of the information presented. ● Chapters are well organised with logical sequencing. Ideas are clearly developed with adequate support.	1.25	5	
						TOTAL : /100 MARKS	

RUBRIC B - System Usability and System Function Evaluation (Research Based Project)

Dimension	1	2	3	4	Weight	Maximum marks	Marks
Introduction	● The title hardly reflects the focus of the study, revealing little information about the variables, subjects & research setting. ● Background information is hardly relevant and does not provide a clear lead-in to the research problem. ● Problem statement is hardly articulated clearly and not supported/justified by theory and/or past research. ● Research Objectives & Questions/ hypotheses, scope and limitation are hardly focused and clear. ● Hardly any key terms are operationally defined clearly. ● Implementation plan not provided.	● The title reflects the focus of the study, revealing some information about the variables, subjects & research setting. ● Background information is fairly relevant but does not provide a clear lead-in to the research problem. ● Problem statement is articulated fairly clearly but only minimally supported/ justified by theory and/or past research. ● Research Objectives & Questions/ hypotheses, scope and limitation are fairly focused and clear. ● Some key terms are operationally defined clearly. ● Implementation plan is inadequate.	● The title clearly reflects the focus of the study, revealing fairly adequate information about the variables, subjects & research setting. ● Background information is relevant and provide a clear lead-in to research problem. ● Problem statement is articulated clearly and supported/justified by theory and/or past research. ● Research Objectives & Questions/ hypotheses, scope and limitation are focused and clear. ● Most key terms are operationally defined clearly. ● Implementation plan is sufficient but can be improved.	● The title very clearly reflects the focus of the study, revealing adequate information about the variables, subjects & research setting. ● Background information is very relevant and provides a very clear lead-in to the research problem. ● Problem statement is articulated very clearly & well supported /justified by theory and/or past research. ● Research Objectives & Questions/ hypotheses, scope and limitation are highly focused and clear. ● All key terms are operationally defined clearly. ● Implementation plan is complete and well planned.	2.5	10	
Literature Review	● The number of empirical studies being reviewed is inadequate.	● The number of empirical studies being reviewed is fairly adequate.	● The number of empirical studies being reviewed is adequate.	● The number of empirical studies being reviewed is more than adequate.	5	20	

	● Articles reviewed are dated and hardly relevant to the focus of the study. ● Hardly any evidence of critical analyses of theory and/or past research. ● The review indicates little understanding of the research topic.	● Articles reviewed are fairly relevant to the focus of the study but somewhat dated. ● Little evidence of critical analyses of theory and/or past research. ● The review indicates fairly good understanding of the research topic.	● Articles reviewed are current and relevant to the focus of the study but somewhat dated. ● Some evidence of critical analyses of theory and/or past research. ● The review indicates good understanding of the research topic.	● Articles reviewed are very current and relevant to the focus of the study. ● Ample evidence of critical analyses of theory & past research. ● The review indicates very good understanding of the research topic.			
Methodology	● Somewhat appropriate research design that is capable of addressing only some of the research questions. ● Rather vague description of the research sample, sampling techniques and data collection procedures. ● Justifications for the use of the methodology are vaguely presented and not discussed.	● Fairly Appropriate research design that is capable of addressing some of the research questions. ● Fairly clear description of the research sample, sampling techniques, data collection procedures and methods of data analysis. ● Justifications for the use of the methodology are presented but not adequately discussed.	● Appropriate research design that is capable of addressing most of the research questions. ● Clear description of the research sample, sampling techniques, data collection procedures and methods of data analysis. ● Justifications for the use of the methodology are presented and somewhat adequately discussed.	● Very appropriate research design that is capable of addressing all the research questions. ● Very clear description of the research sample, sampling techniques, data collection procedures and methods of data analysis. ● Justifications for the use of the methodology are clearly presented and adequately discussed.	5	20	

Research Findings and Discussions	● Results and findings are somewhat inaccurate or incompletely presented. ● Data analyses are appropriate but hardly adequate to address the research questions. ● The discussion may be incomplete or partially/not clearly connected to the results. The connection with other sections is vague.	● Results and findings are presented correctly but the interpretation lacks accuracy. ● Data analyses are appropriate but only adequate to address some of the research questions. ● The discussion interprets some of the findings and is somewhat connected with other sections of the report such as the background, problem statement, research questions, instruments and results.	● Results and findings are presented correctly with accurate interpretation. ● Data analyses are appropriate, and are adequate to address most of the research questions. ● The discussion interprets most of the findings and is connected with other sections of the report such as the background, problem statement, research questions, instruments and results.	● Results and findings are presented correctly with accurate and detailed interpretation. ● Data analyses are appropriate, extensive and sophisticated, and are adequate to address all the research questions. ● The discussion soundly interprets all the findings and is carefully connected with other sections of the report such as the background, problem statement, research questions, instruments and results.	7.5	30
